

Alternative Assessment #3

Time Chart for Computer Practice

Renting an Apartment

Sound Sentences II

My name is _____.

My partner's name is _____.

We went to the lab on _____ (Write the date.)

We started the program at _____ (Write the time.)

We worked for _____ minutes. (Write how many minutes.)

The computer program was    . (Put an **X** on one.)

Scoring Key: Every lab and software project has its own policies about keeping track of time spent on the computer, so a sample time chart is not very useful. However, if you are preparing a portfolio, you might want to include one. I will assume for this project that the class spent some time working on the software together, and then students were asked to spend a minimum of 30 minutes on the software in the lab with a partner. I would also hold them accountable with a quiz or a roleplay regarding the content. That would be an additional assessment, and is not included at this time.

If you like, you can see other lessons in *Sound Sentences II* at my website. It is still under construction, but there are screen shots of all ten lessons.
